What's new in Elden Ring:

...

The new fantasy action RPG from Marvelous, Ultramar. Their story begins with the protagonist, a boy who raises his tired right hand. He was once a strong and noble young hero named Tarnished Knight which was a legendary hero who defended the Alkerrgran Empire. However, his mind and body had been decayed through the use of a magic sword. His right hand was heavily pruned and he was left with

a distaste for combat. Yet he vowed to show his prowess as a hero...

...

A legend already, now reborn! Featuring a changing roster of fantastic heroes in the desert-destroying Romance of the Three Kingdoms, take control of the hero-monks of the guild Kaiba. A dark plot envelops their country as a mysterious and powerful person emerges intent on seizing power from the Shinsengumi, an elite fighting force of the country. Unknowingly acting on behalf of this strong and powerful enemy, the player must clash with the feared Shinsengumi and thwart the powerful enemy's scrupulous ambitions!

...

Get yourself ready for the next chapter of the legend that is Monster Hunter!

...

***Monster Hunter: World* is a deep action role-playing game (RPG) with elements of team-based third-person shooter (TPS) combat. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment. In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others.**

...

You have been summoned to fight Orc with a combination of your weapons to melt the fray.

...

Your instinct leads to victory as you dash toward your ally to activate his attack.

"Many hands make light work!"

I've been asked to write a Web Application where users will be able to enter and submit database records. I was hoping to use a JSP, in particular the JSTL , to dynamically generate HTML code by parsing parameters sent in by the user and then outputting that HTML back to the user. I'm having a bit of trouble thinking how to approach this since the HTML will be absolutely dynamic. I'm completely unsure what content will be displayed to the user based on the parameters. I could just create an absolutely dynamic file in my JSP with no content, but I'm thinking that this might be problematic in some way. How would you approach this problem? A: `#{resource.content}` If you are using Struts 2, you can use the following code (assuming you have a List resource, you can loop through it like above): `#{resource.content}`
