MechWarrior 3 is a Computer Game & Video This is a extensive walkthrough of MechWarrior 3 which will lead you through the entire gameThe official story of this month's Iranian missile test is that it was done on the 22nd of March, in Iran's western desert. Seismologists say their readings show the epicenter was in the southwest of the country, although they can't say exactly where. The test reportedly produced an earthquake of magnitude 5.4, which is pretty weak compared to recent Iranian exercises. The government is taking advantage of the opportunity to claim that this was a successful test of an intercontinental ballistic missile, which is in direct violation of the June 30th nuclear deal with the world powers. As normal, there is no mention of this in the Western media. Iran's most important ally, Russia, is also insisting that Iran's test was done in a "closed military zone", which is nonsense; a military zone is not a closed one. Yet the Western media has to stick to this line, otherwise it would have to admit that the deal was a failure. According to unnamed U.S. officials, the long-range missile exploded a day later (usually weapons are tested for the first time three weeks before it is launched, to prevent people from knowing when it was going to happen), and the new missile is said to have a "hardened warhead" (usually this refers to nuclear warheads, which, despite the Western hysteria, are still in very short supply in Iran). Yet still, there is not a single Western media outlet reporting on this. Why? One is that the mainstream media is used to making war-related issues disappear. The political elite do not want to be reminded that the weapons-grade uranium they are desperately trying to enrich is going to be used to make a bomb. Similarly, they would rather not be reminded that the U.S. is launching thousands of new cruise missiles and drone attacks every single day, all over the world. It's the same reason that no one ever shows pictures of corpses of people who were killed in the U.S. drone wars (again, don't ask what the mainstream media thinks about those). Another reason
