The best place to find the most suitable and memorable one is at the computer or phone. In that case, either click the link or copy/paste it to your gadget. If you are searching for the most suitable password, then one of the best options would be a combination of letters, numbers, and symbols. To do it, you need to make sure that they are all unique. In a way, this will ensure that there is no point in having just a duplicate or misspelled word. However, the easiest option for you is to use the quotation marks.
